# Stand out as an Autodesk Certified Professional

Get the job you want with the skills you have

Competition for talent is fierce in today's marketplace. Employers want to attract and retain well-qualified, ambitious professionals who not only work hard, but also help them win new projects and gain industry recognition. And you want to get ahead—and stay there. As an Autodesk Certified Professional(ACP) you:

- Earn an industry-recognized credential that helps prove your skill level and can get you hired.
- Accelerate your professional development and help enhance your credibility and career success.
- Validate your skills and join an elite team of Autodesk Certified professionals.

With an Autodesk Certification, you gain a competitive advantage that not only boosts your productivity and value, it also provides an industry-recognized endorsement of your expertise. Certification at this level demonstrates the skills needed to stand out from the competition and pursue career advancement.

Certification prerequisites

Autodesk Certified Professional certifications are designed for industry professionals who possess advanced skills and can solve complex challenges in workflow and design. The experience needed to earn an ACP certification typically comes from having worked with the software on a regular basis in a professional environment for at least 2-7 years or the equivalent to approximately 1,200 hours of real-world Autodesk software experience.

Take an Autodesk Certified Professional exam

The Autodesk Certified Professional certification exams can be taken at a Pearson VUE Testing Center or through OnVUE, Pearson VUE's online proctored environment. The exams are proctored and test the skills covered in the official exam objectives. Candidates are given 120 minutes to complete an ACP certification exam. You can purchase an exam voucher, find a testing center, schedule an exam, and review the exam objectives at PearsonVUE.com/Autodesk.

Receive an official Autodesk certificate and digital badge

The Autodesk Certified Professional certifications are the industry recognized credentials for users who have mastered the Autodesk software skills covered in these exams. After earning an Autodesk Certification, you will receive an official certification and digital badge from Autodesk to share on your resume and portfolio.
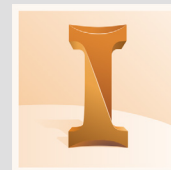

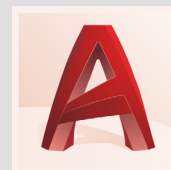

Exam preparation resources

For training on Autodesk software, please contact an Autodesk Authorized Training Center. For practice tests and additional learning resources visit Autodeskstore.pearsonvue.com. Download the official Autodesk Certification exam objectives at Autodesk.com/Certifications.

Earn the Autodesk Certification that's right for your career.

GIVE YOUR ORGANIZATION THE POWER TO EXCEL

Stay competitive with a team of Autodesk Certified Professionals

Today's marketplace is both crowded and complex. Companies need any advantage they can find to win the best projects. And if you can acquire a competitive advantage that is specifically designed to boost the productivity and credibility of your employees, then that's much more powerful.

Autodesk Certification is that powerful advantage, whether you're in manufacturing, construction, civil engineering, architecture or design. It has been developed to not only validate the skills and knowledge of your people, but also to accelerate their professional development, improve their productivity and help you get the most out of their software investment, while strengthening your organization's competitiveness.

Additionally, Autodesk Certification is a critical tool in your hiring process. Improved workforce management and better hiring decisions help you maximize your investment in your most valuable resources – your employees.

Get the most out of your team—with Autodesk Certified Professional certifications

The Autodesk Certified Professional(ACP) certifications were developed to objectively validate the skills and knowledge of anyone who uses Autodesk software. Autodesk Certification can enhance the competitive edge and reputation of organizations that adopt its use, while providing an industry-accepted credential that professionals can use to increase their productivity and advance their careers. Autodesk offers a range of product and role-based certification options to help you achieve your organizations goals.
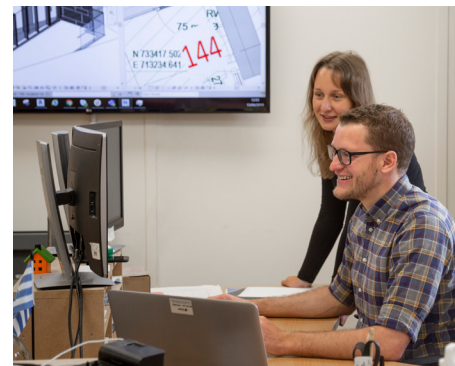

Flexible options to take an exam

The Autodesk Certified Professional certifications exams can be taken at a Pearson VUE Testing Center or through OnVUE, Pearson VUE's online proctored environment by providing your employees with an exam voucher that can be redeemed through Pearson VUE. Learn more at PearsonVUE.com/Autodesk.
