

## Testing Tips for new item types

1. Candidates should be aware that there will not always be 5 answer choices for multiple choice items.
2. Fill in the Blank items that are expressed as a percentage will look like this: “\_\_\_\_\_ % (round to the nearest 1 decimal place)”. The candidate should type in a value like “3.6”.
3. For Multiple Choice, Multiple Selection items, 2 or 3 of the answer choices will be correct. Candidates should precisely select the correct responses.
4. For Exams MAS-I and MAS-II, item scoring will remain an “all or nothing” approach.
