Overview

Client proctored – appointment required exam delivery allows clients to set up a testing site at their own facility, using their own equipment. Clients are responsible for maintaining site configurations, setting up their own proctors, and running the testing site. The Pearson VUE Browser Lock secure browser launches Exam Launchpad. Exams are then delivered via the Athena—Browser Edition test driver.

This document covers how to install and configure all the software and site settings so you can administer your own Client proctored testing site.

This section identifies symbols you will see in this document and how to contact VUE Support Services (VSS) for technical assistance.

See the [Client proctored – appointment required A-BE proctor user guide](#) for instructions on how to administer a Client proctored – appointment required testing event. This guide was written for proctors to include only those procedures needed to administer a testing event.

Technical support

Contacts

The [Contacts](#) page identifies who to contact for non-technical support, for example assistance with accommodations, exam registration issues, or help on maintaining your schedule.

Technical support

For technical support issues such as trouble with software or issues with connectivity, please visit the **Pearson VUE VSS Support** page at www.pearsonhelp.com. This site allows you to connect with a remote operator to receive support, use Live chat to connect with a VUE Support Specialist, locate the region-specific phone numbers to call and speak with a VUE Support Specialist, as well as other support links.

Proctor & Candidate requirements

Internet access

Configure Internet connectivity

Use the links in this sidebar and at the bottom of the page to navigate through the document.

System requirements

This section provides information you need to prepare a site for a Client proctored – appointment required testing event. Please make sure you read this information carefully and perform all necessary procedures before starting the process described in the [Configure Site](#) section of this document.

All tasks in this section are performed by the site administrator or the local network administrator.

- Verify your Administration workstation and all exam delivery workstations meet the minimum system requirements
- Verify the Administration workstation and all exam delivery workstations can properly connect to the Internet
- Verify the Administration workstation and all exam delivery workstations can access the required URLs to deliver and administer exams

System requirements

Proctor & candidate requirements

Internet access

Configure Internet connectivity

Proctor & candidate technical requirements

Caution

Pearson VUE does not support the following:

- **Virtual machines** in any form are prohibited

Site administrators must ensure the exam delivery and proctor workstations meet the minimum system requirements to deliver an exam.

See the Advanced technical requirements document for a complete list of the minimum and recommended exam delivery and administration workstation system requirements.

- [Client proctored – appointment required Advanced Technical Requirements for A—BE](#)

System requirements

Proctor & candidate requirements

Internet access

Configure Internet connectivity

Caution

If you have any trouble running the IBT exam(s) using the Pearson VUE Browser Lock secure browser or the Athena—Browser Edition (A-BE) test driver, check the Advanced Technical Requirements for additional configuration that may be required.

Touch Screen Laptops, Tablets and Smartphones are strictly prohibited.

(Examples of prohibited portable computing devices include, but are not limited to: Surface Pro, Chromebooks, Android and iOS phones, and tablets.) Using a wired network connection is strongly encouraged because it is more secure and more reliable. Since the proctor and Pearson VUE do not control the internet, performance is dependent on the local internet connection. Keep in mind that a slow internet connection may impact the candidate's experience.

Caution

If candidates will use wireless connections, it is the Test Administrator's (proctor) responsibility to verify the wireless connection is configured to meet the following requirement prior to candidate testing:

- The wireless connection must be set with the highest level of security available—**WPA2** (preferred) or **WPA**.
- WEP is not allowed.
- Open or unsecured wireless networks are strictly prohibited.

System requirements

Proctor & Candidate requirements

Internet access

Configure Internet connectivity

On the day of the testing event, proctors must run a Connection Check from the exam delivery room to ensure the internet bandwidth can handle the volume of exams and to ensure a connection to the cluster can be made. See the [Run Connection Check](#) section.

Internet access

Both the Administration workstation and the exam delivery workstations must have access to the Internet to maintain site information, access the Connect/ServiceDirect case reporting system, and to deliver internet-based exams. For performance reasons, access must be through an existing office LAN connection to the Internet, or another high-speed option such as cable, DSL, or ISDN. The speed and availability of your test center's Internet connection will have a direct impact on the quality of your test center's operations.

System requirements

Proctor & Candidate requirements

Internet access

Configure Internet connectivity

Configure Internet connectivity settings

The Client proctored – appointment required test center requires access on the **Administration** and **Exam Delivery Workstations** to the following URLs during setup and/or delivery. Please work with the local network administrator to ensure that the following websites can be accessed:

WEBSITE	ADMINISTRATION WORKSTATION	EXAM DELIVERY WORKSTATION
www.pearsonvue.com	N/A	Required for candidates to register and pay for exams
https://connect.pearsonvue.com/Connect/#/authenticate/login	Required as part of the setup process to access the case, download the security certificate, and secure browser.	N/A

Configure the site

Client proctored – appointment required exam delivery consists of an administration workstation and one or more exam delivery workstations connected to the Internet. The Client proctored – appointment required applications are accessed on these workstations.

There are four web-based applications that work together to manage exam delivery at Client proctored centers: **Site Manager**, **Connect User Management**, **Proctoring**, and **Exam Launchpad** via the secure browser.

This section of the document walks you through:

- How the initial site user is added to the system and how to login to the Connect portal, verifying your user profile is assigned the correct roles
- Verifying your user account is properly configured
- How to configure open and closed site rules, set up exam delivery workstations, set up assets, enter site directions, and select site contacts in Site Manager
- How to create Proctor users that will admit candidates for exams and unlock the exams, and capture candidate photographs if the client requires it

Use the links in this sidebar and at the bottom of the page to navigate through the document.

Set up open and closed rules

Open and closed site availability rules define the hours of operation for your site. Open rules define specific days and hours that your site is available to deliver exams. Closed rules define specific days and hours that your site is specifically closed (such as on holidays or for an emergency). Candidates are prevented from registering for exams during closed hours.

The testing system evaluates the rules you create when candidates register for an exam appointment. Closed rules override all open rules for the period selected in the closed rule. The closed rule prevents candidates from registering for exam appointments during the dates and times when a site is scheduled to be closed.

1. Select the **Availability** category and then select the **Hours** menu in the left navigation.

Configure site

Set up assets

Assets are resources needed to deliver an exam to a candidate. Assets include the applications used as part of the testing process and supporting materials, such as exhibits. The assets you add to your site are tracked by the Pearson VUE Testing System, and they are used to determine whether an exam can be scheduled at your site. See the [Assets](#) topic in the **Site Manager** online help.

Enter directions

The testing system must contain clear and accurate directions to your site. These directions are used by candidates scheduling exams at your center through the Pearson VUE Candidate website or a Pearson VUE Call Center. For help in entering directions in Site Manager, see the [Location](#) topic in the **Site Manager** online help.

Site activation

Site activation checklist

Activate your site

Site activation

After configuring your site, you must activate the site so you can deliver candidate exams. We recommend you also test your site following the instructions in the [Appendix: Test the System](#) section of this document.

Site activation checklist

This is a list of the items required to activate the exams for your testing site.

Site Manager Setup

- An **open rule** for the site's standard open hours is set up in the [Availability](#) category on the [Hours](#) page.
- [Exam delivery workstations](#) have been set up – one for each workstation where the exam will be delivered.

Personnel

- All Personnel who will be operating the Client proctored test center for Pearson VUE have been added in Connect User Management.
- The **Chief Administrator, Billing, Contract,** and **On Site Technical Support contacts** have been added to the list in the [Settings](#) category on the [Contacts](#) page in Site Manager. See the [Contacts](#) topic in the Site Manager online help.

 **Note**

Use the links in this sidebar and at the bottom of the page to navigate through the document.

 **Note**

Site Activation

Site activation checklist

Activate your site

Set Administrator Roles

- The chief administrator and one other user must have the **May add and edit (other) users** role. Additional Administrators may be added and assigned the **May reset passwords and disable accounts** role.

Run Connection Check

- Run Connection Check from the Connect portal on the **Administration workstation** at the exam delivery location to verify the internet connection is robust enough to handle the number of candidates that will be testing that day.

ServiceDirect

- Create a Case in ServiceDirect using instructions from chapter 7 in the [Client Test Center Policies & Procedures Guide](#).

Site Activation

Site activation checklist

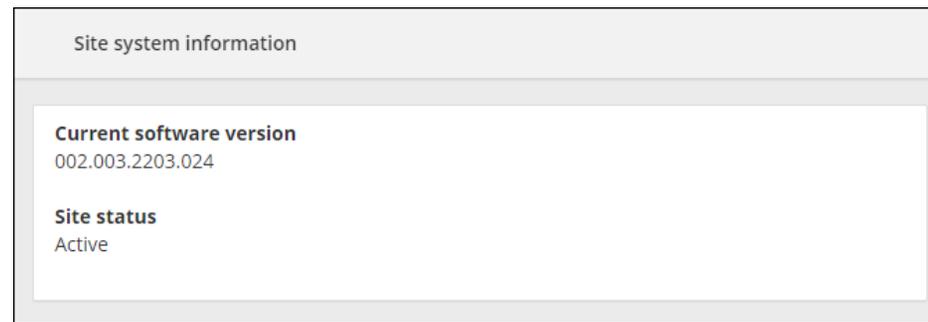

Activate your site

Activate your site

- Complete the items in the [Site Activation Checklist](#).
- **Site Manager Setup**—Instructions for these items are provided in the [Site Manager configuration](#) section of this document.
- **MinSpec-ZFP-TDFT** exam has been taken to test the admissions process. (Recommended, but not required.) See the [Test the system](#) section of this document.
- **Create a ServiceDirect case to activate your site**

After you have completed these items, please allow 1 business day for VUE Support Services to activate and authorize your test center to deliver Pearson VUE exams.

Once your site is activated, the Site system information page in the Connect portal now lists your Site status as **Active**, and the current VUE Testing System software version installed on the Hub is displayed.

Before an event

Run Connection Check

Create a proctoring event

Use the links in this sidebar and at the bottom of the page to navigate through the document.

Before an event

Several actions must be completed by the proctor prior to the event day.

This section of the document walks you through:

- Running Connection Check to verify that the site can connect to the Internet and successfully deliver exams using the Athena—Browser Edition test driver
- Create a proctoring event to admit candidates for their exams on testing day

Before an event

Run Connection Check

Create a proctoring event

Run Connection Check from Connect portal

Prior to running any IBT exam on an exam delivery workstation, you must verify that the site can connect to the Internet and successfully deliver exams using the Athena—Browser Edition test driver. The **Connection Check** application was designed to allow users to verify that they can connect to the Internet and successfully deliver exams using the Athena—Browser Edition test driver. The connection check performs two tasks. A speed test determines the upload and download speeds of your current internet connection. The connection test verifies connectivity to the servers that are used to deliver an exam. You must successfully pass both the speed test and the connection test to deliver an Athena—Browser Edition exam on the Pearson VUE Browser Lock secure browser or the candidate may encounter issues with delivering the exam.

Note

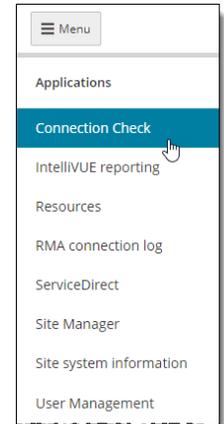

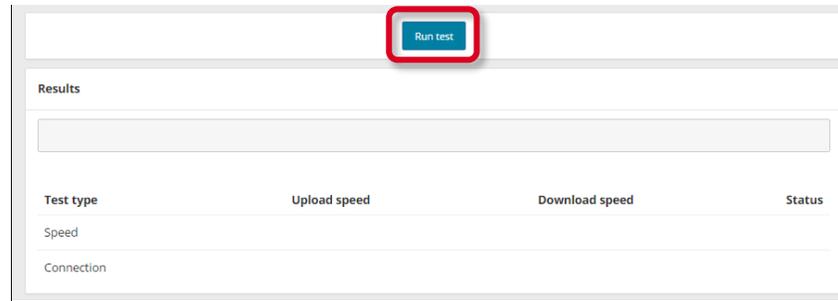

The Proctor must run a connection check on their system to run the TDFT for testing purposes. Proctors must run the connection check at the test venue prior to launching an exam at the event to ensure the Internet connection is working properly.

Before an event

Run Connection Check

Create a proctoring event

1. In the Connect portal, select the **Back to Menu** option on the left navigation menu.
2. Select the **Back to applications** option on the left navigation menu.
3. Select the **Connection Check** menu.
4. **Connection Check** opens. Select the **Run test** button.

The connection check performs two tasks: runs a speed test and a connection test.

- The speed test determines the upload and download speeds of your current internet connection for the site.
- The connection test verifies connectivity to the servers that are used to deliver an exam.

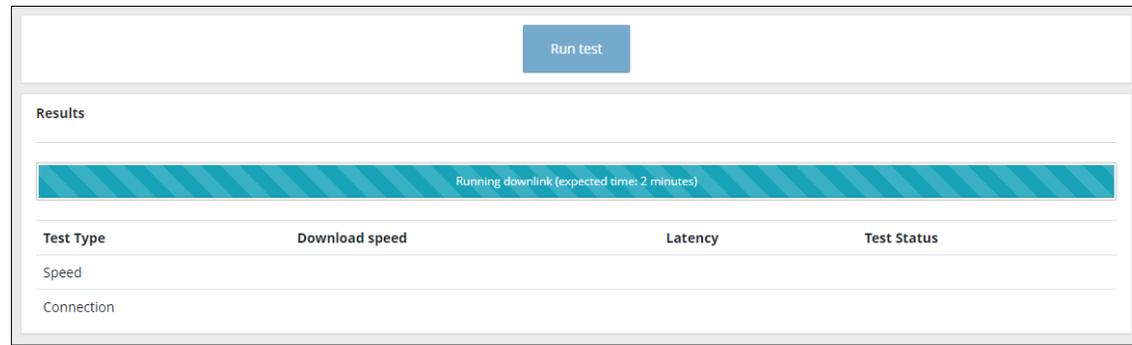

Your site **must pass both the speed test and the connection test** to successfully deliver an Athena—Browser Edition exam.

Before an event

Run Connection Check

Create a proctoring event

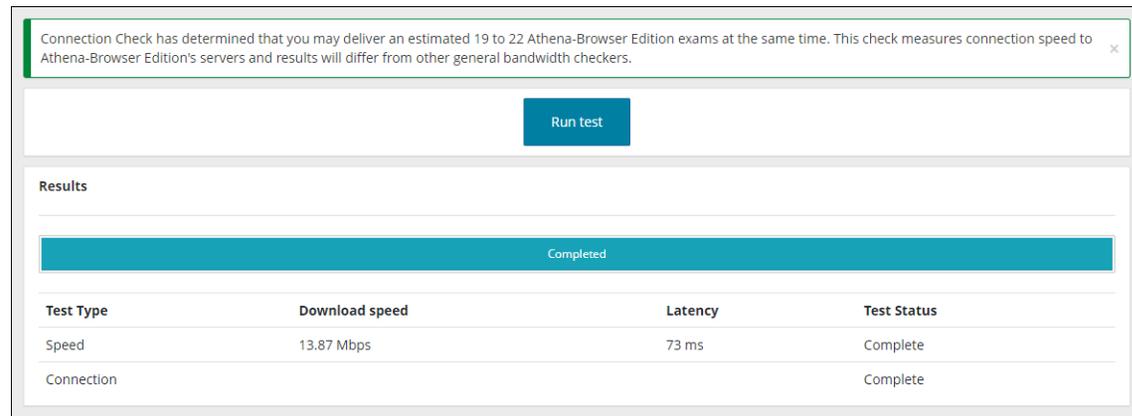

5. The Speed test displays a progress bar as the application is running.

The screenshot shows a 'Run test' button at the top. Below it is a 'Results' section with a progress bar labeled 'Running downlink (expected time: 2 minutes)'. A table below the progress bar has the following structure:

Test Type	Download speed	Latency	Test Status
Speed			
Connection			

If the speed test and the connection test were both successful, a message identifies the estimated number of Athena—Browser Edition exams that can be delivered concurrently from your location.

The screenshot shows a 'Run test' button at the top. Below it is a 'Results' section with a progress bar labeled 'Completed'. A message at the top of the results section reads: 'Connection Check has determined that you may deliver an estimated 19 to 22 Athena-Browser Edition exams at the same time. This check measures connection speed to Athena-Browser Edition's servers and results will differ from other general bandwidth checkers.' Below the message is a table with the following structure:

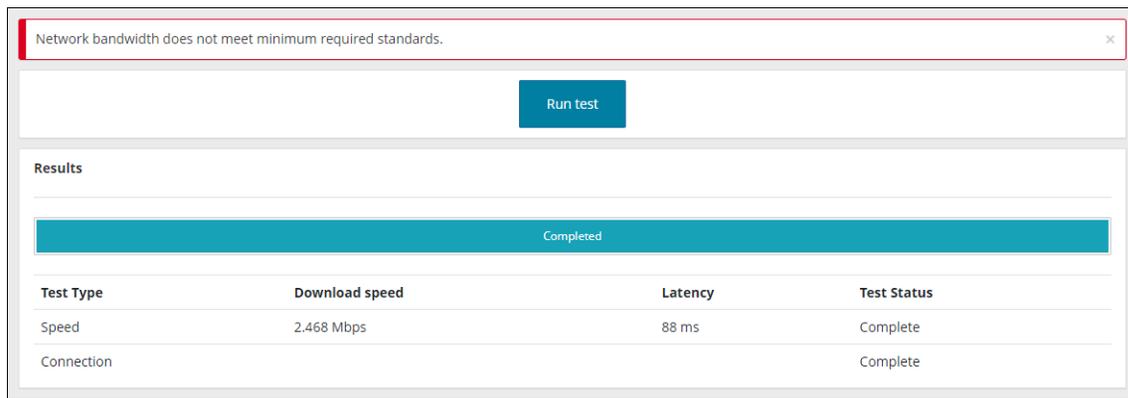

Test Type	Download speed	Latency	Test Status
Speed	13.87 Mbps	73 ms	Complete
Connection			Complete

Before an event

Run Connection Check

Create a proctoring event

If either the speed test or the connection test failed, a message states connection check failed and Athena—Browser Edition exams cannot be delivered from your location.

Network bandwidth does not meet minimum required standards. ×

[Run test](#)

Results

Completed

Test Type	Download speed	Latency	Test Status
Speed	2.468 Mbps	88 ms	Complete
Connection			Complete

6. If your connection check fails, see the Connection Check online help for advice on troubleshooting a failed connection check. Select the **Help** button on the Connect ribbon at the top of the window.

Before an event

Run Connection Check

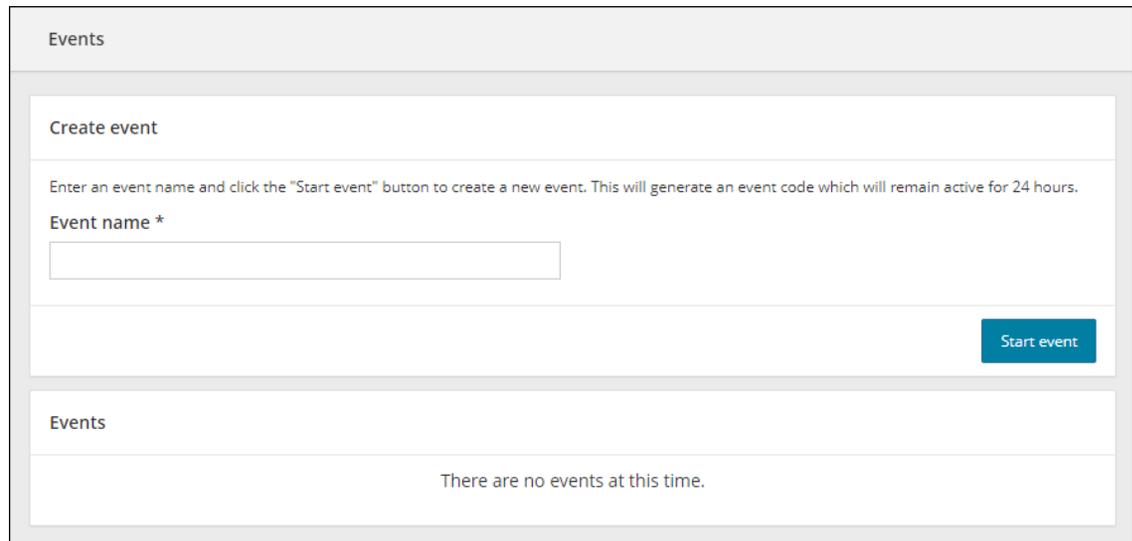

Create proctoring event

Create a proctoring event

 Prior to a testing event proctors must create an event in the **Proctoring** application in the Connect portal. Events are used to admit candidates for their exams on testing day. The Proctoring application allows proctors to create the event, view the event, view the candidate and exam details, admit candidates for the event, and unlock exams for the candidate to begin testing. Events may be reused for multiple testing days.

1. Select the **Proctoring** menu in the left navigation pane.
2. The **Events** dashboard opens.

If this is the first time a user at the site has worked with the Proctoring application, no events are listed on the Events dashboard.

The screenshot shows the 'Events' dashboard in the Proctoring application. At the top, there is a 'Create event' section with a text input field for 'Event name *' and a 'Start event' button. Below this, there is an 'Events' section that displays 'There are no events at this time.'

Before an event

Run Connection Check

Create proctoring event

Once any proctor at the site creates an event, the events are listed by Event creation date. The events are listed in the most recently created order to the oldest event created order. Users will see all events that have been created for the site by any proctor.

Events

Create event

Enter an event name and click the "Start event" button to create a new event. This will generate an event code which will remain active for 24 hours.

Event name *

Events

Event name	Event date	
Tahoe Training	August 18, 2016 12:06 PM	<input type="button" value="View"/>
Vegas Conference	August 18, 2016 12:02 PM	<input type="button" value="View"/>
My Test Event	August 18, 2016 10:57 AM	<input type="button" value="View"/>

50 per page ▲ 1 - 3 of 3

Create proctoring event

3. On the Events dashboard, enter an **Event name** in the **Create event** section.

Events

Create event

Enter an event name and click the "Start event" button to create a new event. This will generate an event code which will remain active for 24 hours.

Event name *

Start event

Events

There are no events at this time.

Note

- Event names can be a max of 50 characters. If you exceed this limit a warning message reminds you the entry must be 50 characters or less.
- Event names can be duplicated because each event is given an event creation date and time stamp that makes it unique.
- If you have many proctors for your site, you may recommend that proctors include their name as part of the event name. Proctors can see the list of all events for the site, but the events do not indicate which proctor created the event. Adding the proctor's name will make it easier for the proctors to easily see which proctors created the event.

Before an event

Run Connection Check

Create proctoring event

4. Select the **Start event** button.

Note

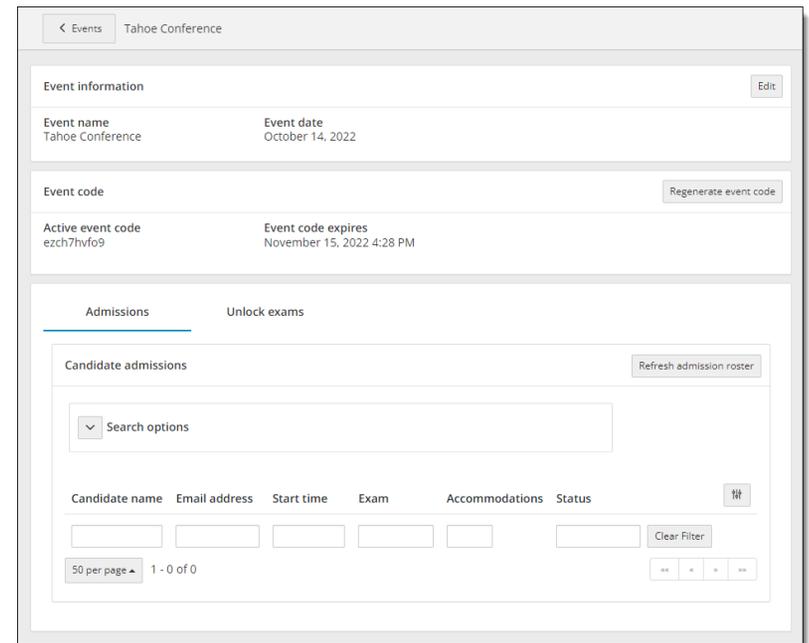

Make sure you want to create the event before you select **Start event**.

There is **no way to delete an event** once it has been created.

You may edit the event name once it has been created. The date and time stamp are never altered.

The event details page is displayed.

- The event is assigned an **event creation date and time**.
- The event is assigned an **event code** that is active for 24-hours.
- Under the Admissions tab, the **candidate admission roster** is empty until a candidate registers for an exam. It contains a roster of all candidates that have registered for an exam to be taken at your site on the current day.

The screenshot shows the 'Tahoe Conference' event details page. It includes sections for 'Event information' (Event name: Tahoe Conference, Event date: October 14, 2022), 'Event code' (Active event code: ezch7hvf09, Event code expires: November 15, 2022 4:28 PM), and 'Admissions' (Candidate admissions table with columns for Candidate name, Email address, Start time, Exam, Accommodations, and Status). The Admissions section is currently empty, showing a search bar and a 'Refresh admission roster' button.

Before an event

Run Connection Check

Create proctoring event

Note

- Event codes are used to unlock candidate exams. Candidates enter the event code during the testing process allowing proctors to unlock the exam from a single, centralized location.
- Event codes remain active for 24 hours from the moment they are generated.
- It is the proctor's responsibility to communicate this event code to the candidate at the event. It is up to the proctor at the event to determine the best method of communicating the code to the candidates. Possible options include:
 - Write the event code on a whiteboard in the exam delivery room.
 - Print the event code on a slip of paper and hand it to the candidate as they enter the exam delivery room and collect it after candidates have entered it into their system.
- If an event code is compromised in any way, or if proctors want to continue using an event for more than the 24 hours the event code is valid, proctors may regenerate a new event code which is valid for 24 hours from the time it was regenerated. When a new event code is generated, the previous event code expires. Candidates may no longer be admitted with an expired event code. The event is now active for 24 hours based on the active event code.

5. Select the **Events** button  at the top of the **Event Details** page.

Note

Use the links in this sidebar and at the bottom of the page to navigate through the document.

Event day

On event day, the proctor must perform several tasks before the candidates arrive for testing.

- Proctors must launch the secure browser on every exam delivery workstation which opens to Exam Launchpad where candidates enter their personal information and event code so the exam can be unlocked. You may alternatively place the secure browser/Browser Lock executable on the exam delivery workstation for the day of testing. Browser Lock must be downloaded from the client web page prior to each testing day to ensure the most current version is utilized.
- Proctors must ensure there is an active event code for the event they will use to admit candidates and unlock exams.
- Proctors must write the event code on a whiteboard in the exam delivery room, or otherwise communicate the event code, so candidates can enter the event code in Exam Launchpad.

Proctors and/or admission staff use the **Proctoring** application to admit candidates and unlock exam registrations. Candidates use the **Exam Launchpad** secure browser to complete their exams.

This section of the document walks you through:

- Admitting candidates
- Seating candidates for exams
- Unlocking exams
- Removing the secure browser from the exam delivery workstations once candidates have completed their exams

Event day

Launch secure browser

Remove secure browser

Launch the secure browser

 Prior to the testing event, proctors must download the secure browser on every exam delivery workstation. Always download the secure browser from the website to ensure you have the most current version of the secure browser for the testing day.

Note

Proctors must launch the secure browser on every exam delivery workstation. The Candidate Search page should be ready for every candidate as they are seated at the exam delivery workstation. Proctors may alternatively place the executable on the exam delivery desktop and ask candidates to double-click the executable to launch the secure browser.

Note

Any workstation used to deliver a candidate exam must use the Pearson VUE Browser Lock secure web browser to launch the exams.

As a best practice you should **save any open files** and **close all open applications** prior to launching an exam.

Note

The **First name**, **Last name**, and **Email** fields are not case sensitive, but candidates must enter the name and email exactly as it was created in the system when they registered for the exam.

The secure browser Candidate: exam lobby page notifies the candidate that the unlock request has been sent to the proctor. Once the proctor unlocks the exam the candidate may begin their exam.

The screenshot shows the 'Candidate: exam lobby' page. At the top, there is the Pearson | VUE logo. Below the logo, the page title 'Candidate: exam lobby' is displayed. To the right of the title, it says 'Signed in as: CasityTD1 CasityTD1'. A yellow-bordered box contains the message: 'Your unlock request has been sent to the proctor. Once the proctor unlocks your exam, this page will automatically refresh and display a "Start exam" button. Click the button to start your exam.' At the bottom of the page, there is a footer with the text: 'Copyright 1996-2022 Pearson Education Inc. or its affiliate(s). All rights reserved. pvuecopyright@pearson.com' and links for 'Terms' and 'Privacy'.

The Unlock exams tab includes the Candidate photo if the candidate requires photo capture for admitting the candidate for an exam.

The screenshot shows the 'Unlock exams' tab in the Pearson VUE interface. At the top, there are tabs for 'Admissions' and 'Unlock exams'. Below the tabs, there is a 'Refresh candidate roster' button and a search bar with a dropdown arrow and the text 'Search options'. A green notification box states 'Candidate roster has been successfully refreshed.' Below this, there is a 'Group unlock' section with '0 selected'. The main part of the interface is a table with the following columns: Candidate name, Candidate photo, Exam, Accommodations, and Registration ID. The table contains four rows of candidate data. The first row, Heidi Santiago, has a photo and the exam 'MinSpec-ZFP-TDFT : Zero Footprint TDFT'. The second row, Jack Jones, has 'Not required' for the photo and the exam 'E2EExam : E2EExam-proctored'. The third row, Marcus King, also has 'Not required' for the photo and the exam 'E2EExam : E2EExam-proctored'. The fourth row, Yvonne Strebel, has 'Photo opt-out' for the photo and the exam 'MinSpec-ZFP-TDFT : Zero Footprint TDFT'. Each row has 'Unlock' and 'View details' buttons. At the bottom, there is a pagination control showing '5 per page' and '1 - 4 of 4'.

Candidate name	Candidate photo	Exam	Accommodations	Registration ID
Heidi Santiago		MinSpec-ZFP-TDFT : Zero Footprint TDFT	No	6838071
Jack Jones	Not required	E2EExam : E2EExam-proctored	No	6838092
Marcus King	Not required	E2EExam : E2EExam-proctored	No	6838089
Yvonne Strebel	Photo opt-out	MinSpec-ZFP-TDFT : Zero Footprint TDFT	No	6838073

- When photo capture is not required, the Candidate photo column displays **Not required**.
- When photo capture is required, the Candidate photo column displays the **candidate photo** or **Photo opt-out**.

- To unlock a single candidate exam, the Proctor selects the desired candidate's **Unlock** button. To unlock all candidates waiting to start their exams, select the checkbox to the left of the Candidate name header. This selects all the candidate checkboxes. Select the **Group Unlock** button.

The screenshot shows the 'Unlock exams' interface. At the top, there are tabs for 'Admissions' and 'Unlock exams'. Below the tabs, there is a 'Refresh candidate roster' button and a search bar labeled 'Search options'. A 'Group unlock' button is highlighted with a red box, and it shows '3 selected'. Below this is a table with columns: Candidate name, Candidate photo, Exam, Accommodations, and Registration ID. The table contains three rows of candidates: Heidi Santiago, Jack Jones, and Marcus King. Each row has a checkbox on the left and 'Unlock' and 'View details' buttons on the right. The 'Unlock' button for Marcus King is highlighted with a red box. At the bottom, there is a pagination control showing '5 per page' and '1 - 3 of 3'.

If you unlocked a single exam the Exam status on the **Unlock exams** tab changes to **unlocked** and a message notifies you the exam has been unlocked. The next time the candidate roster is refreshed, the unlocked exam is removed from the Unlock exams tab and only locked exams are listed.

If you group unlocked a bunch of exams, the exams are unlocked and the unlocked exams are no longer displayed on the Unlock exams tab.

The Exam status on the **Admissions tab** changes to **Exam in progress** for unlocked exams.

- The secure browser now changes to **Candidate: ready to begin exam**. The **candidate** selects the **Start exam** button.

- Candidate completes the exam.

Once the candidate completes the exam, the **Admissions** tab lists the exam status as **Complete**.

Remove secure browser

Once all testing is completed for the day, Pearson VUE recommends you remove the secure browser from each exam delivery workstation.

- Open a **Windows Explorer** window and navigate to the **Downloads** directory.
- Locate the **CTC.exe** file and **Delete** it.

Note

Use the links in this sidebar and at the bottom of the page to navigate through the document.

Appendix: Test the system

The testing procedure ensures that the site installation works from end to end. Prior to a testing event, Pearson VUE recommends that you register for a practice exam so you can run through admitting candidates for exams. Start by calling your local VUE Support Specialist to create a candidate account for yourself and to schedule yourself for an exam appointment which you can run on an exam delivery workstation. Then use **Proctoring** to admit yourself for the exam and use **Exam Launchpad** to take the practice exam.

This section of the document walks you through:

- Scheduling a Test Driver Functionality Test (TDFT)
- Admitting yourself for the TDFT exam
- Unlocking the exam
- Completing the exam

Test the system

Schedule exam appointment

Admit and unlock exam

Schedule exam appointment

Note

This is an optional procedure, but Pearson VUE strongly recommends you register for a TDFT so you can run through the procedure for unlocking an exam and running the secure web browser allowing you to launch an exam prior to an exam event.

In this procedure you must contact your local VUE Support Services team to create a candidate account for yourself so you can register for the Test Driver Functionality Tests (TDFT). Please create an account using your own name and address information. You can then use the same account later when running other test exams. Do not create a generic or “dummy” account such as “VUE Admin” or “Mickey Mouse”.

Test Driver Functionality Tests (TDFTs) are exams that Pearson VUE has created to test various types of functionalities on exam delivery workstations. Running these exams ensures that the workstation is prepared to deliver Pearson VUE exams. To perform this process, you must schedule yourself for one appointment which you will take on your administration workstation.

Test the system

Schedule exam appointment

Admit and unlock exam

Note

The process of creating candidate accounts and registering for all other exams besides the **MinSpec-ZFP-TDFT** should be done by calling the **Call Center** or by going to the appropriate **Pearson VUE website program landing page** to register for the exams. We are only asking you to call VSS for purposes of ensuring that your test center is ready to deliver exams once you go live.

Follow these steps to create your candidate account and register for the **MinSpec-ZFP-TDFT** exam:

1. **Call your local Pearson VUE Support representative** using the appropriate phone number in the [Technical Support](#) section of this guide.
2. Ask the VSS representative to **create a candidate account** for you. You must supply the following information:
First name, Last name, Email, Country, Address, City, State, Postal Code, and Phone number.
3. Ask the VSS representative to **register** you for the **MinSpec-ZFP-TDFT exam**. Provide the date you will run the exam.

Test the system

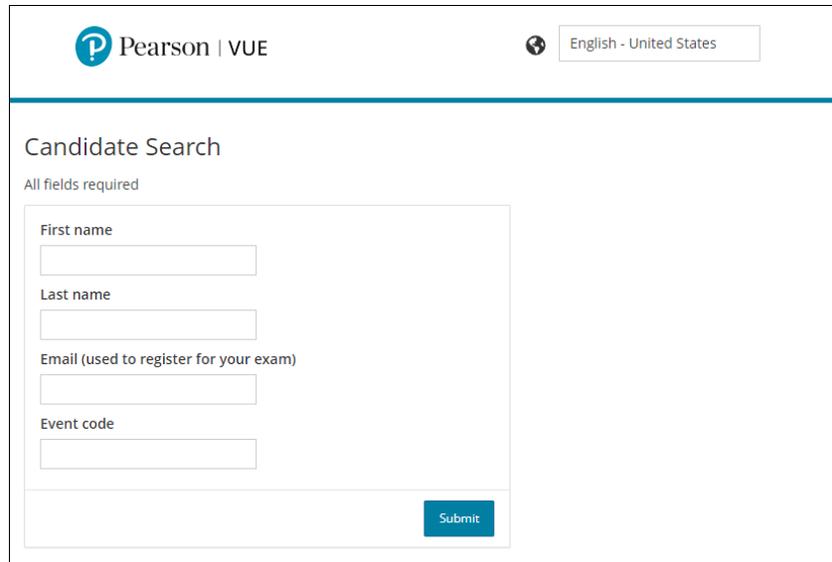

Schedule exam appointment

Admit and unlock exam

Admit and unlock exam for delivery

Before you can launch an exam, you must first admit yourself for the exam. You may only unlock appointments that are scheduled for the current day.

1. Open the **Proctoring** application on the proctor administration workstation.
2. **View** your event.
3. Select the **Admit** button for your candidate registration.
4. On an exam delivery workstation download the Exam Launchpad secure browser from the Client proctored PVBL landing page.
5. Enter your **First name**, **Last name**, **Email address**, the **Event code** for your event, and select **Submit**.

The screenshot shows the Pearson VUE interface. At the top left is the Pearson VUE logo. At the top right is a language selection dropdown set to "English - United States". Below this is a "Candidate Search" section with the note "All fields required". The form contains four input fields: "First name", "Last name", "Email (used to register for your exam)", and "Event code". A blue "Submit" button is located at the bottom right of the form area.
